

## Fund objective

The fund invests in between 50 and 60 shares; it provides investors with the means to participate in the growth of a spread of leading British companies. These will mainly be shares quoted on the FTSE100 index of largest companies, although some companies that are not members of the FTSE100 may be held.

**Note 1:** Our funds are rated according to the level of volatility they show relative to other Canada Life funds, as measured by the monthly standard deviation of returns. Standard deviation gives a guide as to the probability of how much a fund price will rise or fall over one month. Volatility is one way of measuring the potential risk of a fund and should not be relied upon in isolation for making investment decisions. **The ratings are generally reviewed once a year and we do not notify policyholders or financial advisers of any change to a fund's volatility rating.**
