Warnings

Prior to 20 July 2012 this fund was called Canlife Cautious Managed.

Some funds operate a securities lending process under which assets held by the fund may be lent to another regulated financial institution. Securities lending is quite common and allows a fund to generate additional income from the fees it charges borrowers. There are controls to reduce the risk of any loss to the fund should the borrower become unable to return the assets. These can include obtaining high quality assets as security from the borrower and employing market agents to administer the programme and cover any losses. Canada Life closely monitors the institutions we lend to and the agents we work with. Managers of external funds are responsible for their own controls to ensure that the risks are appropriately managed.

OCF shown does not include any expenses that would be included in a Property Expenses Ratio.
