

Fund objective

The aim of the BlackRock UK Special Situations Fund is to achieve long-term capital growth for investors. The Fund invests primarily in the shares of companies incorporated or listed in the UK and will normally have an emphasis on small or medium sized companies. The Fund may also invest in collective investment schemes. Small and medium sized companies are those whose market capitalisation is lower than that of companies in the FTSE 100 Index at the time of the Fund's investment.

The stated objective is that of the underlying fund. We will endeavour to keep this up to date. However policyholders will not be advised of any minor changes to the stated objective.

Underlying fund

BlackRock UK Special Situations

The Canlife BlackRock UK Special Situations Pension Fund invests solely in the BlackRock UK Special Situations Unit Trust (except for a small cash balance, which may be held from time to time). This ensures that whilst the unit price of the Canlife fund will differ from that of the BlackRock fund, the performance of the two will closely correspond, subject to different charges and any effects due to the treatment of tax.

Note 1: Our funds are rated according to the level of volatility they show relative to other Canada Life funds, as measured by the monthly standard deviation of returns. Standard deviation gives a guide as to the probability of how much a fund price will rise or fall over one month. Volatility is one way of measuring the potential risk of a fund and should not be relied upon in isolation for making investment decisions. **The ratings are generally reviewed once a year and we do not notify policyholders or financial advisers of any change to a fund's volatility rating.**
