

Fund objective

The fund aims to provide capital growth from a balanced portfolio of units in other collective investment schemes, covering markets throughout the world. Investment will be across a range of unit trusts, both UK and international, the weighting in each sector being dependent on our views of the market.

The stated objective is that of the underlying fund. We will endeavour to keep this up to date. However policyholders will not be advised of any minor changes to the stated objective.

Underlying fund

CF Canlife Balanced

The Canlife Balance Managed Pension Fund invests solely in the CF Canlife Balanced Unit Trust (except for a small cash balance, which may be held from time to time). This ensures that whilst the unit price of the Canlife fund will differ from that of the Unit Trust, the performance of the two will closely correspond, subject to different charges and any effects due to the treatment of tax.

Note 1: Our funds are rated according to the level of volatility they show relative to other Canada Life funds, as measured by the monthly standard deviation of returns. Standard deviation gives a guide as to the probability of how much a fund price will rise or fall over one month. Volatility is one way of measuring the potential risk of a fund and should not be relied upon in isolation for making investment decisions. **The ratings are generally reviewed once a year and we do not notify policyholders or financial advisers of any change to a fund's volatility rating.**
