Warnings

This Canada Life fund invests in an underlying fund. The investment objectives of the Canada Life fund are consistent with those of the underlying fund, however the investment return may differ due to any difference in charges and tax deductions between the two funds. More information on the underlying fund can be found by visiting the investment manager's own website.

Some funds operate a securities lending process under which assets held by the fund may be lent to another regulated financial institution. Securities lending is quite common and allows a fund to generate additional income from the fees it charges borrowers. There are controls to reduce the risk of any loss to the fund should the borrower become unable to return the assets. These can include obtaining high quality assets as security from the borrower and employing market agents to administer the programme and cover any losses. Canada Life closely monitors the institutions we lend to and the agents we work with. Managers of external funds are responsible for their own controls to ensure that the risks are appropriately managed.
