<sup>2</sup>

Volatility groups run from 1 (least volatile) to 4 (most volatile) for the funds available from Canada Life and are generally reviewed once a year; we do not notify policyholders or advisers of any changes. For more information please see our guide to understanding volatility, available on our website.

## Fund objective

The fund aims to achieve long-term capital growth whilst seeking to remain within a defined risk band by aligning its asset allocation with Dynamic Planner risk profile 6. This diversified fund of funds invests primarily in UK and international shares with the remainder in fixed income securities and UK commercial property. The fund implements the asset allocation by investing primarily in actively managed funds from Canada Life Investments' in-house fund range.

## Warnings

This Canada Life fund invests in an underlying fund. The investment objectives of the Canada Life fund are consistent with those of the underlying fund, however the investment return may differ due to any difference in charges and tax deductions between the two funds. More information on the underlying fund can be found by visiting the investment manager's own website.

The underlying fund may invest in property funds that may be illiquid and subject to wide price spreads, both of which can impact the value of the fund. The value of the property is based on the opinion of a valuer and is therefore subjective.

Some funds operate a securities lending process under which assets held by the fund may be lent to another regulated financial institution. Securities lending is quite common and allows a fund to generate additional income from the fees it charges borrowers. There are controls to reduce the risk of any loss to the fund should the borrower become unable to return the assets. These can include obtaining high quality assets as security from the borrower and employing market agents to administer the programme and cover any losses. Canada Life closely monitors the institutions we lend to and the agents we work with. Managers of external funds are responsible for their own controls to ensure that the risks are appropriately managed.

OCF shown does not include any expenses that would be included in a Property Expenses Ratio.
