Statistical calculations are annualised and based on last 36 months total return performance against the benchmark.

An investment should not be contemplated until the risks of investment and tax implications have been considered fully. Past performance is not a guide to future performance. The value of investments may fall as well as rise and investors may not get back the amount invested. Income from investments may fluctuate. Currency fluctuations can also affect performance.

1 The Morningstar Rating is an assessment of a fund's past performance - based on both return and risk - which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. This fund received its Morningstar Rating as at 30/11/2018.

All data expressed as at 30/11/2018 unless otherwise stated. Source of performance: FE, bid to bid with net income reinvested, share class = C Acc.

Risk warnings

Counterparty Risk: As the fund may enter into currency hedging arrangements, there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, receiving less than is due or receiving nothing.

Operational Risk: Emerging markets tend to be more susceptible to large short term swings than more established markets. There is also a greater risk of being unable to buy or sell securities or that other parties may default and not meet their obligations, causing loss to the fund.

Currency Risk: As the fund invests in global securities movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.

Concentrated Fund: The fund intentionally holds a small number of investments. The fund may therefore be subject to larger than normal swings in its value.

For full details of the fund's risks, please see the latest prospectus and the Key Investor Information Document (KIID).
