An investment should not be contemplated until the risks of investment and tax implications have been considered fully. Past performance is not a guide to future performance. The value of investments may fall as well as rise and investors may not get back the amount invested. Income from investments may fluctuate. Currency fluctuations can also affect the performance.

1 The Morningstar Rating is an assessment of a fund's past performance – based on both return and risk – which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. This fund received its Morningstar Rating as at 31/08/2020.

All data expressed as at 31/08/2020 unless otherwise stated. Source of performance: FE, bid to bid with net income reinvested, share class = C Acc.

Risk warnings

Credit Risk: The value of fixed interest securities is affected by changes in interest rates and inflation as well as changes in their credit ratings.

Property Fund Investment Risk: The fund may invest in property funds that may be illiquid and subject to wide price spreads, both of which can impact the value of the fund. The value of the property is based on the opinion of a valuer and is therefore subjective.

Currency Risk: As the fund invests indirectly in overseas securities, exchange rate movements may, when not hedged, cause the value of your investment to increase or decrease.

Non-UCITS Retail Scheme (NURS): The fund can be less diversified than UCITS schemes as it has higher investment limits for certain types of assets. It can also invest in assets which are not available to UCITS schemes. This can increase the potential rewards but can also increase risk.

For full details of the fund's risks, please see the latest prospectus and the Key Investor Information Document (KIID).
