

LF CANLIFE PORTFOLIO VII FUND

ABOUT THE FUND

The fund aims to achieve long-term capital growth whilst seeking to remain within a defined risk band. The fund aligns its asset allocation with Dynamic Planner's risk profile 7. This diversified fund of funds invests in UK and international equities, fixed interest securities and UK commercial property. The fund implements the asset allocation by investing primarily in funds from Canada Life Investments' in-house fund range.

Beta	1.14
Tracking Error	2.84
Information Ratio	-0.40

Statistical calculations are annualised and based on last 36 months total return performance against the sector index.

An investment should not be contemplated until the risks of investment and tax implications have been considered fully. Past performance is not a guide to future performance. The value of investments may fall as well as rise and investors may not get back the amount invested. Income from investments may fluctuate. Currency fluctuations can also affect performance.

1 The Morningstar Rating is an assessment of a fund's past performance - based on both return and risk - which shows how similar investments compare with their competitors. A high rating alone is insufficient basis for an investment decision. This fund received its Morningstar Rating as at 31/08/2020.

All data expressed as at 31/08/2020 unless otherwise stated. Source of performance: FE, bid to bid with net income reinvested, share class = C Acc.

Risk warnings

Property Fund Investment Risk: The fund may invest in property funds that may be illiquid and subject to wide price spreads, both of which can impact the value of the fund.

Emerging Markets Risk: Emerging markets may be less liquid, more volatile and subject to less oversight. There is a greater risk that other parties may default, causing loss to the fund.

Currency Risk: As the fund invests indirectly in overseas securities, exchange rate movements may, when not hedged, cause the value of your investment to increase or decrease.

Non-UCITS Retail Scheme (NURS): The fund can be less diversified than UCITS schemes as it has higher investment limits for certain types of assets. It can also invest in assets which are not available to UCITS schemes. This can increase the potential rewards but can also increase risk.

For full details of the fund's risks, please see the latest prospectus and the Key Investor Information Document (KIID).

Other share classes are available.

The fund may invest in property funds that may be illiquid and subject to wide price spreads, both of which can impact the value of the fund. The value of the property is based on the opinion of a valuer and is therefore subjective.
