

SMA Baillie Giff Pacific Pn Fund

About the Fund - 31 December, 2008

Fund Objective

Aims to achieve capital growth by investment in the Far East, Australasia and in the Indian subcontinent in any economic sector. The managers' current policy excludes investment in Japan and Australasia.

Important Note

Past performance is not a guide to the future. Remember that the value of investments may fall as well as rise and is not guaranteed. Scottish Mutual does not guarantee the performance of any of the funds. The investment can be affected by changing conditions on the stockmarkets in which the Fund invests. Both the value of the investment, and income the Fund may pay, can go down or up. Investors are not certain to make a profit and may make a loss. The Fund is high risk and therefore only suitable for those investors prepared to accept the above average volatility inherent in emerging market investment. The effects of currency movement can be significant for the Fund, as all of its investments are denominated in currencies other than sterling. A typical collective investment vehicle has between 80 and 100 stocks in its portfolio. The Fund has a more concentrated portfolio which means that it may carry more risk than funds spread across a large number of companies. Derivatives may be entered into to hedge against various risks, as permitted by the Regulations, but will not be used for speculative purposes. As a result, in a rising market, there is a risk that potential gains may be restricted.

Fund Type	Pension
Fund Management Company	Baillie
Fund Universe	ABI Pensions
Launch Date	01/09/2002
Fund Size	£ 0.83 m
ABI Sector	†Asia Pacific Excluding Japan
Fund Code (SEDOL)	3198935

Past performance is not a guide to the future and the value of investments may fall as well as rise. Percentage growth, bid to bid, income re-invested. Please note quartile ranking relates to the calculated value of the sector median which consists of all primary funds in the relevant sector. This median is not the same as the ABI Sector Average shown.

Scottish Mutual makes no guarantee as to the performance of the fund. Due to the launch date of the fund, only limited performance figures may be available.

Sharpe Ratio: A measure of the annual excess return (how much the fund is better or worse than the risk-free rate of return ie the yield on Government Gilts) divided by the annualised standard deviation of returns from the benchmark (a measure of how much the fund return varies from the benchmark over time). Sharpe ratio should be positive and the higher the better. It should be noted that negative Sharpe ratios are misleading and should not be used to compare the risk return characteristics of a fund.

Volatility: Volatility is represented by the Lognormal Annual Standard Deviation of the fund, (a measure of how much the fund return varies from the benchmark over time).
