

## SMA Opportunity Fund

### About the Fund - 31 December, 2008

#### Fund Objective

The Scottish Mutual Opportunity Fund attempts to outperform the ABI Global Equity Sector over the medium to longer term. It invests predominately in global equities, typically offering exposure to the equity markets of the UK, US, Japan and the Far East.

#### Important Note

Past performance is not necessarily a guide to the future and cannot provide a guarantee of the future returns of a fund. Please remember that the value of investments and the income from them can go down as well as up. Scottish Mutual makes no guarantee as to the performance of the fund. This fund switched from the Stockmarket Managed to the Global Equity Sector on 1/9/2004. As a consequence its performance record prior to that date is not valid for marketing purposes.

Quartile Rank Within Sector	4	4	2	2	4
-----------------------------	---	---	---	---	---

© Financial Express Holdings 2009

Past performance is not a guide to the future and the value of investments may fall as well as rise. Percentage growth, bid to bid, income re-invested. Please note quartile ranking relates to the calculated value of the sector median which consists of all primary funds in the relevant sector. This median is not the same as the ABI Sector Average shown.

Scottish Mutual makes no guarantee as to the performance of the fund. Due to the launch date of the fund, only limited performance figures may be available.

**Sharpe Ratio:** A measure of the annual excess return (how much the fund is better or worse than the risk-free rate of return ie the yield on Government Gilts) divided by the annualised standard deviation of returns from the benchmark (a measure of how much the fund return varies from the benchmark over time). Sharpe ratio should be positive and the higher the better. It should be noted that negative Sharpe ratios are misleading and should not be used to compare the risk return characteristics of a fund.

**Volatility:** Volatility is represented by the Lognormal Annual Standard Deviation of the fund, (a measure of how much the fund return varies from the benchmark over time).
