

SMA Invesco Perp Global Bd Pn Fund

About the Fund - 31 December, 2008

Fund Objective

The Scottish Mutual Invesco Perpetual Global Bond Fund aims to achieve a good overall investment return in the medium to long term with relative security of capital. The Fund intends to invest primarily in international bonds of differing interest yields and maturities. It may include debentures and loan stock and other instruments that the fund managers consider appropriate (which from 13th February 2004 may include shares, units in collective investment schemes, warrants, deposits, derivatives and other permitted investments and transactions).

Important Note

Please remember that the value of investments and the income from them can go down as well as up (this may partly be the result of exchange rate fluctuations in investments which have an exposure to foreign currencies) and you may not get back the full amount invested. Past performance is not necessarily a guide to the future and cannot provide a guarantee of the future returns of a fund. Scottish Mutual makes no guarantee as to the performance of the fund. More than 35% of the value of the Invesco Perpetual Global Bond Fund may consist of Government and public securities, as detailed in the Prospectus. The solvency of organisations with whom the fund invests cannot be guaranteed, and any difficulty may adversely affect the fund's performance. Current tax levels and reliefs are liable to change and their value will depend on the individual's circumstances. Investment returns may be affected by changes in the basis of taxation. Invesco Perpetual has expressed its own views and opinions in this leaflet and these may change.

Fund Type	Pension
Fund Management Company	Invesco Perpetual
Fund Universe	ABI Pensions
Launch Date	01/09/2002
Fund Size	£ 2.01 m

Quartile Rank Within Sector

© Financial Express Holdings 2009

Past performance is not a guide to the future and the value of investments may fall as well as rise. Percentage growth, bid to bid, income re-invested. Please note quartile ranking relates to the calculated value of the sector median which consists of all primary funds in the relevant sector. This median is not the same as the ABI Sector Average shown.

Scottish Mutual makes no guarantee as to the performance of the fund. Due to the launch date of the fund, only limited performance figures may be available.

Sharpe Ratio: A measure of the annual excess return (how much the fund is better or worse than the risk-free rate of return ie the yield on Government Gilts) divided by the annualised standard deviation of returns from the benchmark (a measure of how much the fund return varies from the benchmark over time). Sharpe ratio should be positive and the higher the better. It should be noted that negative Sharpe ratios are misleading and should not be used to compare the risk return characteristics of a fund.

Volatility: Volatility is represented by the Lognormal Annual Standard Deviation of the fund, (a measure of how much the fund return varies from the benchmark over time).
