

31 March 2022

This document is intended for use by individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used.

<p>The Fund aims to provide long-term growth by investing in one or more actively managed Sterling denominated corporate bond funds. The Fund may also hold funds that invest a proportion of assets in other bonds (such as overseas bonds, high yield bonds and gilts) and in money market instruments such as Floating Rate Notes (FRNs) and Certificates of Deposits (CDs).</p> <p>The Fund will only invest in actively managed funds. Where the Fund invests in more than one fund, the allocation between these funds will be re-balanced periodically.</p> <p>These funds may use derivatives for the purpose of efficient portfolio management, reduction of risk or to meet their respective investment objectives (including taking short positions) where permitted and appropriate.</p> <p>The value of investments within the Fund can fall as well as rise and is not guaranteed – you may get back less than you put in. The Sterling value of overseas assets held in the Fund may rise and fall as a result of exchange rate fluctuations.</p>	Pension Investment Fund
	Blended Fund
	Quarterly

Launch Date	September 2012
Standard Life Current Fund Size (31/03/2022)	£3.2m
Standard Life Fund Code	NNPB
Volatility Rating (0-7)	3

The investment performance you will experience from investing in the Standard Life version of the fund will vary from the investment performance you would experience from investing in the underlying fund directly. This will be as a result of a number of differences, such as charges, tax and timing of investment.

	3 Months (%)	1 Year (%)	3 Years (%)	5 Years (%)
Standard Life Active Corporate Bond (MT) Pension Fund	-5.9	-5.9	2.0	5.8

Notes: The information shown relates to the past. Past performance is not a guide to the future. The value of your investment can go down as well as up. For the relevant charges on your policy please refer to your policy documentation.

Where a fund holds overseas assets the Sterling value of these assets may rise and fall as a result of exchange rate fluctuations.

Definition:

Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments. Volatility ratings are calculated on a scale of 0-7.

Money Market - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs) and allowances for tax, dividends and interest due if appropriate.
