| <p>The aim of the LR Fixed Income Fund is to provide growth ahead of inflation in the medium term through investment in funds which provide exposure to inflation linked UK government bonds and corporate bonds. These funds invest in government and corporate bonds issued by the UK Government, companies and financial institutions respectively, as well as inflation linked bonds which aim to change in value in line with general prices in the UK economy.</p> <p>The Fund may invest in both actively managed funds and passive index tracking funds. Where the Fund invests in more than one fund, the allocation between these funds will be re-balanced periodically.</p> <p>These funds may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate.</p> <p>The value of investments within the Fund can fall as well as rise and is not guaranteed – you may get back less than you put in.</p> <p>The sterling value of overseas assets held in the Fund may rise and fall as a result of exchange rate fluctuations.</p> <p>The Fund has been designed in conjunction with the Trustees and their advisers specifically for the Lloyd's Register Superannuation Fund Association. Lloyd's Register Trustees will continue to consult with Standard Life and their advisers on the future make up of the Fund, which may result in changes being made from time to time.</p> | Pension Investment Fund |
| | Blended Fund |
| | Quarterly |

|----------------------------------------------|-------------|
| Launch Date | August 2018 |
| Standard Life Current Fund Size (30/09/2021) | £15.5m |
| Standard Life Fund Code | BDIF |
| Volatility Rating (0-7) | 5 |

The investment performance you will experience from investing in the Standard Life version of the fund will vary from the investment performance you would experience from investing in the underlying fund directly. This will be as a result of a number of differences, such as charges, tax and timing of investment.

| | 3 Months (%) | 1 Year (%) | 3 Years (%) | 5 Years (%) |
|----------------------|--------------|------------|-------------|-------------|
| LR Fixed Income Fund | -0.1 | -2.2 | 18.5 | - |

Notes: The information shown relates to the past. Past performance is not a guide to the future. The value of your investment can go down as well as up. For the relevant charges on your policy please refer to your policy documentation.

Where a fund holds overseas assets the Sterling value of these assets may rise and fall as a result of exchange rate fluctuations.

Definition:

Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments. Volatility ratings are calculated on a scale of 0-7.

Money Market - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs) and allowances for tax, dividends and interest due if appropriate.
