

30 June 2020

This document is intended for use by individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used.

<p>The SL iShares UK Equity Index Pension Fund invests primarily in the iShares UK Equity Index (UK) Fund. The aim of the iShares UK Equity Index (UK) Fund is summarised below.</p> <p>The Fund aims to provide a return on your investment (generated through an increase in the value of the assets held by the Fund) by tracking closely the performance of the FTSE All Share Index, the Fund's benchmark index. The Fund invests in equity securities (e.g. shares) of companies that make up the benchmark index. The benchmark index is designed to measure the performance of equity securities of small, mid and large capitalisation companies listed in the United Kingdom. The benchmark index is a free float-adjusted market capitalisation weighted index. Free float-adjusted means that only shares readily available in the market rather than all of a company's issued shares are used in calculating the benchmark index. Free float-adjusted market capitalisation is the share price of a company multiplied by the number of shares readily available in the market.</p> <p>The value of any investment can fall as well as rise and is not guaranteed – you may get back less than you pay in.</p> <p>For further information on the iShares UK Equity Index (UK) Fund, please refer to the fund manager fact sheet, link provided below.</p> <p>Standard Life does not control or take any responsibility for the content of this.</p> <p>iShares UK Equity Index (UK) - Fund Factsheet http://webfund6.financialexpress.net/clients/StandardLife/FS.aspx?Code=0RW4&Date=01/06/2020</p>	Pension Investment Fund

		Volatility Rating (0-7)	5

The FTSE All Share Index is calculated solely by FTSE International Limited ("FTSE"). FTSE does not sponsor, endorse or promote this fund. All copyright in the index values and constituent list vests in FTSE. "FTSE ®" is a trade mark jointly owned by the London Stock Exchange Plc and The Financial Times Limited and is used by FTSE under licence. "All Share" is a trade mark of FTSE.

The investment performance you will experience from investing in the Standard Life version of the fund will vary from the investment performance you would experience from investing in the underlying fund directly. This will be as a result of a number of differences, such as charges, tax and timing of investment.

Underlying Fund Information

Note: Asset / Sector / Regional compositions are shown in a standardised format due to categorisation of items. This may be marginally different to the way the same information is displayed by the underlying fund manager.

ABI UK All Companies	14.7	-12.2	-8.3	6.1

Notes: The information shown relates to the past. Past performance is not a guide to the future. The value of your investment can go down as well as up. For the relevant charges on your policy please refer to your policy documentation.

Where a fund holds overseas assets the Sterling value of these assets may rise and fall as a result of exchange rate fluctuations.

Definition: Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments. Volatility ratings are calculated on a scale of 0-7.

Money Market - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs) and allowances for tax, dividends and interest due if appropriate.
