† FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.

**The risk descriptions and ratings provided are intended as a guide only and should not be relied on in isolation to make investment decisions. Risk ratings are calculated and provided by a third party and are not a recommendation by Zurich as to the suitability of a fund for investment. For more details on risk ratings please refer to our investment brochure.

Fund objective

The Fund aims to provide income with the prospect of some investment growth over the long term. It looks to outperform the FTSE Actuaries UK Conventional Gilts All Stocks Index over rolling 3-year periods, after the deduction of charges.

The Fund is actively managed, and will invest at least 80% of its assets in UK government bonds (gilts). The Fund may also invest in other bonds, including index linked UK government bonds (index-linked gilts), as well as bonds issued by governments (or government agencies) of other developed countries, international organisations, or companies. The bonds selected are usually investment grade and denominated in sterling (or hedged back to sterling, if a different currency). The Fund may also invest in other assets such as cash and deposits, and hold other funds (including funds managed by Columbia Threadneedle companies) when deemed appropriate.

The Fund is not permitted to invest in derivatives for investment purposes, but derivatives may be used with the aim of reducing risk or managing the Fund more efficiently. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.

The FTSE Actuaries UK Conventional Gilts All Stocks Index is regarded as an appropriate performance measure of sterling-denominated government bonds, issued by the UK government. It provides a suitable target benchmark against which Fund performance will be measured and evaluated over time.
