The Sterling Defensive fund aims to provide a lower risk environment with some potential for medium to long-term growth and invests in international government and corporate debt, with a proportion invested in international equities. The risk profile of this investment choice is the lowest of the five portfolios.

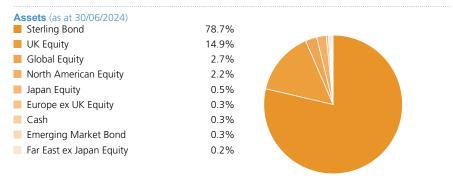

#### **Fund information**

This investment choice is a portfolio internally managed by Zurich on a discretionary basis. The investment policy is overseen by Columbia Threadneedle Investments according to investment mandates set and controlled by Zurich.

### Fund commentary (as at 30/06/2024)

The fund has a large emphasis on UK bonds, with a focus on government securities (gilts). While it was a negative quarter for gilts, UK equities rose in Q2. Over the period, the 10-year gilt yield increased from 3.93% to 4.17% as bond prices dipped. UK interest rates were left unchanged despite the continued easing of inflation, which finally fell to the Bank of England's target level in May. The biggest portfolio adjustment was to increase global equities while scaling back some individual regional positions. The largest reduction was to equities in the US, followed by Europe, the UK and Asia. Additionally, within the UK allocation, we adjusted exposure to different strategies. In fixed income, we added to gilts, which offer an attractive level of income.

<sup>†</sup> FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.
