† FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.

Fund objective

The US dollar Cautious fund aims to provide a low risk environment with some potential for medium to long-term growth and invests primarily in fixed-interest securities but generally carry a higher proportion of equities than the Defensive investment choices of the Managed range.

Fund information

This investment choice is a portfolio internally managed by Zurich on a discretionary basis. The investment policy is overseen by Columbia Threadneedle Investments according to investment mandates set and controlled by Zurich.

Fund commentary (as at 30/06/2024)

The fund has a large emphasis on US Treasury bonds. During Q2, the 10-year Treasury yield rose from 4.20% to 4.40% as bond prices fell. However, it was another good quarter for US equities, boosted by the strength of technology stocks, which were buoyed by continued optimism over the growth of AI. The biggest portfolio adjustment was to increase global equities while scaling back some individual regional allocations, most notably the US. Given the elevated valuations of US technology stocks, we preferred to broaden exposure to US quality-growth companies by adding to the Global Select Fund. Additionally, within the US equity allocation, we adjusted exposure to different strategies. Elsewhere, we reduced equities in the UK and Europe, but added to US Treasury bonds.
