Sector and Asset split information is based on the latest corresponding data points made available by our data provider, the collective data stated shows the combined proportionally weighted target fund holding, where such information is made available by the underlying Fund Manager. This is a binary requirement, therefore where this data is not available for one or more of the constituent funds no split data will be shown.

## Fund objective

The fund seeks to gain exposure to a diversified notional portfolio comprising approximately 40% by value of equity securities and 60% by value of fixed income securities.

The strategy of the fund will seek to achieve its investment objective predominantly through investment in passive, index-tracking collective investment schemes. Fixed Income allocations will utilise a currency hedging programme managed within the passive structure, this will hedge currency exposure held within the fund back to the fund base currency.

## Target asset split (as at 30/04/2022)

|                             |        |  |
