† FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. ### Fund commentary (as at 31/03/2024)

The portfolio across a range of world equity markets, with a focus on Europe, which had a good quarter. Investors were cheered by the outcome of the European Central Bank's March meeting; policymakers began to discuss easing interest rates as inflation continued to fall closer to the ECB's target. Eurozone economic data was mixed. Although manufacturing remained weak, services started to rebound and consumer confidence improved. Within the portfolio, we reduced the allocations to UK and global equities but added to continental Europe and Japan. We also made some underlying strategy adjustments within the Europe ex UK, US and global equity allocations. For example, in global equities, we moved more in favour of a mainstream growth fund.
