† FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.

\*\*The risk descriptions and ratings provided are intended as a guide only and should not be relied on in isolation to make investment decisions. Risk ratings are calculated and provided by a third party and are not a recommendation by Zurich as to the suitability of a fund for investment. For more details on risk ratings please refer to our investment brochure.

### Fund objective

The euro Performance fund aims to provide long-term capital growth. The exposure to fixed-interest securities is lower than that of the Blue Chip investment choice.

### Fund information

This investment choice is a portfolio internally managed by Zurich on a discretionary basis. The investment policy is overseen by Columbia Threadneedle Investments according to investment mandates set and controlled by Zurich.

### Fund commentary (as at 30/06/2024)

The majority of the portfolio is invested in equities, with an emphasis on Europe, which produced a modest positive return in Q2. Investors were cheered by a cut in interest rates by the European Central Bank and the strong performance of technology stocks. By far the biggest portfolio adjustments were to increase global equities while scaling back the regional US equity allocation. Given the elevated valuations of US technology stocks, we preferred to broaden exposure to US quality-growth companies by adding to the Global Select Fund, as well as the Global Focus Fund. We also reduced equities in Asia, the UK and Japan, but added to European government bonds. Additionally, within the European and US equity allocations, we adjusted exposure to different strategies.
