† FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.

**The risk descriptions and ratings provided are intended as a guide only and should not be relied on in isolation to make investment decisions. Risk ratings are calculated and provided by a third party and are not a recommendation by Zurich as to the suitability of a fund for investment. For more details on risk ratings please refer to our investment brochure.

Fund objective

The US dollar Cautious fund aims to provide a low risk environment with some potential for medium to long-term growth and invests primarily in fixed-interest securities but generally carry a higher proportion of equities than the Defensive investment choices of the Managed range.

Fund information

This investment choice is a portfolio internally managed by Zurich on a discretionary basis. The investment policy is overseen by Columbia Threadneedle Investments according to investment mandates set and controlled by Zurich.

Fund commentary (as at 31/03/2023)

The fund has a large emphasis on US Treasury bonds, which performed well in Q1. The 10-year Treasury yield fell 41 basis points to 3.47% as bond prices rose. To help control inflation, the Federal Reserve raised US interest rates by 0.25% in both February and March, bringing the target range to 4.75%-5.0%. Fed policymakers also signalled just one further hike in 2023 and withdrew familiar wording that "ongoing rate increases" should be expected. It was also a good quarter for US equities. During the period, the biggest portfolio adjustment was an increased exposure to US Treasury bonds. In equities, we realised some gains in the US and top-sliced the Japanese position. We also added marginally to Europe ex UK.
