† FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.

**The risk descriptions and ratings provided are intended as a guide only and should not be relied on in isolation to make investment decisions. Risk ratings are calculated and provided by a third party and are not a recommendation by Zurich as to the suitability of a fund for investment. For more details on risk ratings please refer to our investment brochure.

Fund objective

The US dollar Defensive fund aims to provide a lower risk environment with some potential for medium to long-term growth and invests in international government and corporate debt, with a proportion invested in international equities. The risk profile of this investment choice is the lowest of the five portfolios.

Fund information

This investment choice is a portfolio internally managed by Zurich on a discretionary basis. The investment policy is overseen by Columbia Threadneedle Investments according to investment mandates set and controlled by Zurich.

Fund commentary (as at 31/03/2025)

The fund maintained a large allocation to the US bond market, with an emphasis on Treasuries (government securities). Treasuries rallied as various indicators suggested economic conditions in the US were worsening, which prompted us to take some profits from the fund's fixed-income holdings. By contrast, we took advantage of share-price weakness to increase exposure to US equities, which had a poor quarter amid indications of moderating economic growth and concerns about the impact of fresh trade tariffs. US shares were also affected by weakness in the sizeable technology sector, following the launch of Chinese start-up DeepSeek's low-cost artificial intelligence model. The fund's small international equity exposures were mostly unchanged over the period.
