

We've written this fund factsheet assuming you have some experience of investing. This means that although we have tried to write as much as possible in plain language, we may have used certain words or phrases that might not be familiar to you, particularly if you are new to investing. Its purpose is to help you understand how the fund is invested and performing. You should not use it on its own for making investment decisions. It is not an offer to buy or sell any investments or shares. If there's something you don't understand, please contact your adviser. If you don't have an adviser, please call us, we can help you find one near you.

### Fund objective

The Invesco Income fund (the underlying 'Fund') aims to achieve a reasonable level of income together with capital growth over the long term (5 years plus).

The Fund invests at least 80% of its assets in shares or other equity related securities of companies incorporated, domiciled or carrying out the main part of their economic activity in the UK. In pursuing the Fund's investment objective, the fund manager may consider it appropriate to also invest in other transferable securities (including private and unlisted equities and non UK companies), money market instruments, collective investment schemes (including funds managed by the Invesco group), deposits and cash.

The Fund may use derivatives for efficient portfolio management purposes only, to reduce risk, reduce costs and/or generate additional capital or income.

The Fund has an active investment approach based on stock selection driven by the fund manager's assessment of valuation, investing in companies that enable the Fund to grow its dividend and deliver capital appreciation. It has a flexible approach with no inbuilt bias to sector or company size.

Given the Fund's asset allocation, its performance can be compared against the Investment Association UK All Companies Sector. However, the fund is actively managed and is not constrained by any benchmark.

### Fund features

This fund invests in assets which have the potential to produce superior longer term returns. Over some periods of time there can be significant falls, as well as rises, in the value of your investment.

## Things you need to know

We've based this information on our current understanding of law and practice. We make every effort to ensure that this information is helpful, accurate and correct but it may change or may not apply to your personal circumstances. Before taking any action you should always check with an appropriate adviser, as we cannot accept responsibility for any action taken on the basis of this information alone.

All funds carry some risk and you should consider these risks before making an investment decision. The value of investments and any income from them is not guaranteed and can fall as well as rise and will be reduced in real terms by the effects of inflation. The main factors which may increase the risk of this fund include:

- the amount held in overseas assets,
- any concentration in specific areas or sectors,
- the amount invested in property or property shares,
- the use of derivatives and other instruments with the aim of generating outperformance.
- the amount invested in private and unlisted equities which could involve additional risks such as lack of liquidity, concentrated ownership and may result in greater fluctuations in the value of the fund.

Other charges which reduce the number of units you hold may apply. For further information please refer to your product Terms and Conditions.

For a more detailed explanation and other useful information about investments, please refer to our guide - "Making investments clearer - a guide for you", which can be found at [www.zurich.co.uk](http://www.zurich.co.uk).
