

We've written this fund factsheet assuming you have some experience of investing. This means that although we have tried to write as much as possible in plain language, we may have used certain words or phrases that might not be familiar to you, particularly if you are new to investing. Its purpose is to help you understand how the fund is invested and performing. You should not use it on its own for making investment decisions. It is not an offer to buy or sell any investments or shares. If there's something you don't understand, please contact your adviser. If you don't have an adviser, please call us, we can help you find one near you.

## Fund objective

The fund invests in short-term investments such as bank and building society deposits. This policy is designed to offer a high degree of security over the short term. Accordingly it is likely to show a lower growth rate than could reasonably be expected over the longer term for other funds.

The fund is managed by Threadneedle Asset Management Limited.

## Fund features

This fund invests in assets which have the potential to produce stable and steady longer term returns. The returns are expected to be more stable and fluctuate in value far less than equities but as a consequence the returns are likely to be much lower. In some circumstances, the unit price may not increase. For example, when interest rates are low the return from the assets may be less than the charges.

Unless held as part of a personalised portfolio invested to achieve an overall balance of risk and return, this fund is more suited for shorter-term investment. Investing solely in this fund for the longer-term may result in a lower return than a bank or building society savings account.
